INTENTIONAL RESPONSIVE INCLUSIVE EXPERIENCE: FAMILY PLAN

Date: 19 November, 2025 Learner's Name: Dron lakhanpal

Learner's ID#:

Mentoring Educator's Name:

Placement Site Name:

ANECDOTAL OBSERVATION

(What did you see? What did you hear?)

Address: WHO? Example: Child A, age group, educator B
WHEN? Date, time of day duration of experience
WHERE? Indoor, outdoor, learning area
WHAT? What did the children o and what did they say

YOUR ANSWERS MUST BE TYPED ON THIS DOCUMENT, USE AS MUCH SPACE AS NEEDED TO ANSWER THE PROMPTS IN EVERY QUESTION IN EACH SECTION OF THE PLAN.

Ensure your anecdotal observation is:

- objective (measurable facts only);
- written in the past tense;
- written in third person;
- uses gender neutral pronouns (e.g., they/them);
- ensures the anonymity of the people observed, (e.g., Child A/Educator A).
- uses language that is specific

- DO NOT USE it seems..., it appears...,
- DO NOT use developmental language here.
- Approximately 150 words

- **Complete the anecdotal observation section in paragraph format:**

- What do you see or notice about opportunities for family involvement or collaboration in your field setting?

- What interactions have you observed directly and/or indirectly between the Mentoring Educator and family members? Consider relationship building strategies such as, but not limited to:

- involvement
- collaboration,
- styles and methods of communication (example, active listening , conflict resolution, empathic responding)

- What evidence have you observed to demonstrate the program is working to create a sense of belonging between home and the care setting? Refer to HDLH? Document. e.g., routines, traditions, values, spirituality, books, customs, music and language, etc.

Today, at 8:30 a.m. during the outdoor morning drop-off, Family A, with Child A, came to the school gate. Educator A, while holding open the gate, greeted them by saying, "Good morning." Family A fixed Child A's jacket and said, "It is cold today; I put their hat inside the bag." Educator A replied, "Thank you. I'll make sure they have it." Child A went up to the line-up area, and Family A stayed for a moment watching before continuing and leaving the grounds of the school. Other families said a brief hello to Educator A during drop-off, demonstrating frequent opportunities in the program for family participation through daily communication. Before leaving, Family A viewed children's artwork displayed along the window of the hallway. This demonstrated the effort of the program to create a sense of belonging between home and school. The event lasted approximately one minute and occurred within a consistent, supervised drop-off routine.

INTERPRETATION
(What do you think it means?)

Adress why?
Your interpretation:

- is based on your observation.
- is subjective
- uses sentences that start with “It appears...”, “it seems...”, “According to my observation...), etc.

Note: Complete each of the following sections in full sentences paragraph or point form

- It appears that the family values consistent communication during drop-off, as they shared information about the child’s clothing needs for the cold weather.
- According to my observation, the greetings exchanged at the gate help create a predictable routine, which supports smooth transitions from home to school.
- It seems that families feel comfortable sharing quick updates with Educator A, such as items placed in the child’s bag or how the morning went.
- It appears that the educator’s active listening and acknowledgement (“I’ll make sure they have it”) supports positive family–educator relationships.
- According to my observation, the visible display of children’s artwork encourages families to briefly engage with classroom learning, even during short drop-off periods.

- What are the Family’s/caregiver’s interest(s), questions, curiosities? How do you know, give examples from your observation?

  Family A seems interested in making sure Child A is comfortable and prepared for the day at school. From my observation, the family relayed information about the cold weather, and they had also mentioned placing a hat inside the child's bag. This depicted an interest in how the child would be supported during outdoor activities. Family A also viewed the children's artwork located near the entrance. This seemed to show an interest in the learning taking place within the classroom setting. From this observation, the family has provided evidence of engagement with the daily routine and also ensures they stay notified of what their child might need throughout the day.

Consider families/caregivers as partners to “strengthen the quality of early years programs by ensuring these programs are centred on the child and family” HDLH (OMEd, 2014b, p.3).

- How does the program demonstrate **family-centred practice**? e.g., centres collaborate with families on the following: (refer to ECE 233). You may want to ask your Mentoring Educator to help you with these questions. Answer each bullet below:

- **Planning**: (What plans are in place that demonstrate family centred practice)?
  It appears the program demonstrates family-centred planning through consistent morning routines that allow caregivers to share information at drop-off. According to my observation, Educator A greets every family at the gate each day, which creates a predictable opportunity for families to communicate updates or ask questions. This planned routine supports families in feeling welcomed and involved as partners in the child's day.

- **Assessment**: parent's feedback, children's needs being met, is the educator effective at their tasks
- From my observation, the program uses both family input and educator documentation to assess children's needs. When Family A provided information about Child A's morning and outdoor clothing, Educator A acknowledged it and used it to make decisions on behalf of comfort for the child that day. The program also keeps child portfolios and files where educators record observations made, work samples, and notes on children's progress. Records such as these are shared with families through informal conversations and reports to support a collaborative approach to meeting each child's needs.

- **Service Delivery**: how is it carried out/implemented? It seems like the program provides service that is family-centered through consistent, respectful communication and responsive interactions. At drop-off, Educator A listened attentively, acknowledged the information from Family A, and reassured, "I'll make sure they have it." This routine demonstrates that the program supports family-centred practices by being approachable for families, by being responsive to any of their concerns, and by making the environment welcoming so that the caregivers feel comfortable sharing information about their child.

- Identifies one strength and one opportunity for growth to create a sense of **belonging** for family's reference (HDLH?). **You must paraphrase, site your work and include the page number from this document**.

  – Strengths
  According to my observation, the program strengthens a sense of belonging by creating predictable morning routines and welcoming interactions with families. Greeting caregivers at the gate and displaying children's artwork help families feel connected to the learning environment. HDLH explains that belonging is supported when children and families feel recognized, valued, and connected to the school community (OMEd, 2014a, p. 24).

  – Opportunity for growth
  An opportunity for growth is to increase visible family representation in the environment, such as adding family photos, cultural items, or a small "family board" near the drop-off area. HDLH states that belonging is enriched when programs reflect the identities, histories, and contributions of the diverse families they serve (OMEd, 2014a, p. 24).

FULLY DETAILED, INTENTIONAL RESPONSE INCLUISIVE EXPERIENCE

(What will you do?)

Collaborate with your Mentoring Educator about your plan. Get their feedback and approval. Communicate and share your final plan with your Mentoring Educator and have them sign this section before implementing the planned experience the following week.

Complete the following section in point form:

Reflect and describe the following:

- Give your Responsive Inclusive Planned Experience a title/name,
  -Leaf Art at Home – Family Take-Home Activity

- What will you do? Be specific and detailed! Your plan must show the step-by-step process of the experience.

1. I will print the "Leaf Art at Home" activity sheets in advance.
2. On the implementation day, I will place one sheet inside each child's file or cubby during the morning arrival routine.
3. Families will receive the sheet through the regular communication system used in the classroom.
4. I will take one photo of the prepared sheets in the cubby/file area as documentation of implementation.
5. Families can explore the activity at home at a time that works best for them.

- When will you do it? Why? Time/duration:
  I will implement the family activity on Thursday, November 27, 2025, at around 9:30 a.m. I will place the Leaf Art sheets directly into the children's daily files as they prepare to go home. This time works well because families routinely check these files at pick-up. The task will take approximately 3–5 minutes.

- Where will you do it? Why?
  I will place the activity sheets inside the classroom in the children's files. This location is part of the daily communication routine and ensures that all families receive the materials consistently at pick-up time.

- What materials are you using that were in the initial observation and what new materials are you adding to your experience?
- **From initial observation:** family communication files used during daily pick-up.
- **New materials added:** printed "Leaf Art at Home" take-home activity sheets.

- **Must include at least 1 photo** (before, during, or after) of the experience.

Leaf Art at Home
A simple fall activity for families
Materials
• Leaves (different colors and shapes)
• Small sticks or twigs
• Paper or cardboard
• Crayons or chalk
• Optional: glue
Steps
1. Take a short walk and collect leaves and sticks with your child.
2. Lay the materials on a table or flat surface.
3. Encourage your child to arrange the leaves into a picture (face, house, tree, pattern, etc.).
4. Use crayons or chalk to add drawings or details around the leaves.
5. Optional: Glue the leaves in place to keep the artwork.
Try This Together
• Talk about the colors, shapes, and textures of the leaves.
• Count how many leaves you collected.
• Display the finished artwork at home.

Grace!

Reflect on the following:

- How does your intentional responsive experience **connect to your observation and interpretation**? Refer to the:

- **interests**- Families showed interest in daily routines and in checking children's files/cubbies, so providing the Leaf Art sheet through this same system fits naturally with their existing habits.

- **Strengths-** The program already supports belonging through consistent morning greetings and communication with families, which aligns with offering a take-home activity that keeps families connected to classroom learning.

- **opportunity for growth you identified in your interpretation**- My interpretation identified that families could be further supported by having more ways to engage with classroom experiences at home. This take-home activity offers a simple extension families can do together, supporting that opportunity for growth.

- What role will you, as a co-learner, have in your planned response? **Identify one (1) teaching strategy** you will use and describe how it relates to the observed interest, strength and opportunity for growth identified in the interpretation.
  Name the teaching strategy and describe:

  Teaching Strategy: Visual Communication Supports
  In my role as a co-learner, I will support family engagement by using a clear, easy-to-follow visual take-home sheet. This strategy connects to the observed interest in the daily communication routine by giving families information in a format they already use. It also supports the identified strength (belonging through predictable routines) and addresses the opportunity for growth by providing families with an accessible way to participate in their child's learning at home.

- How is your plan responsive inclusive? **Discuss one (1)** of the following Foundations for Learning from *How Does Learning Happen?* HDLH? (OMEd, 2014a): **Indicate which foundation you are connecting your plan to. You must paraphrase, site your work and include the page number.**
  - ✅**Belonging,**
  - Wellbeing,
  - Expression or
  - Engagement

  This plan is responsive and inclusive because it strengthens the connection between home and the classroom through an accessible activity families can explore together. *How Does Learning Happen?* explains that belonging is fostered when children and families feel connected, welcomed, and included in their learning community (OMEd, 2014a, p. 24). By providing a simple take-home activity through the classroom's daily communication files, families are given a meaningful and low-pressure way to be part of their child's learning, which supports their sense of belonging.

SIGNATURE REQUIRED HERE FROM MENTORING EDUCATOR, PLAN IS REVIEWED AND APPROVED FOR IMPLEMENTING NEXT PLACEMENT DAY:

Mentoring Educator's Signature: _____

Date Signed: _____

A grade of 0 will be given in the **Planned Response,** if the Mentoring Educator does not sign this section.

REFLECTION ON EXPERIENCE
(What happened?)

This follow-up reflective extension is based on what happened when you implemented your initial experience. What have you learned and what you will do next to extend your initial planned experience?

Complete the following section (point form is acceptable):

Reflect on the following:

- **How did your planned response support your anticipated focus? Refer to the interests(s), strength and opportunity for growth you identified in your interpretation**.

- The planned response supported my focus on strengthening home–school connection by using the daily file system that families already check.
- It aligned with the family interest in consistent communication and supported the strength identified in my interpretation (predictable routines).
- It addressed the opportunity for growth by giving families a simple way to engage with classroom experiences at home.

- **What happened when you implemented your plan?**

- I placed the Leaf Art at Home sheets into each child's file around 9:30 a.m. on Thursday, November 27, 2025.
- Families took the sheets during pick-up through their normal routine of checking files.
- The process was smooth and took only a few minutes.
- I captured a photo of the prepared files as documentation.

- What did you learn?

- I learned that simple take-home materials can successfully reach families through the classroom's established communication system.
- I learned that family involvement can be supported even without direct conversation, as families naturally interact with the file system.
- I learned that small, easy-to-understand activities are practical and meaningful for busy families.

- **What are some things you did to present new challenges to the child/children, as you were interacting with them?**

- I encouraged children to think about different types of leaves they might find at home.
- I asked a few children what colours or shapes they would choose for their leaf collage.
- I invited children to share their creations the following week if they completed the activity at home.

MENTORING EDUCATOR'S FEEDBACK

A grade of 0 will be given if the initial experience and extension is not implemented to the children in the classroom.

PRINT THIS DOCUMENT FOR THE Mentoring Educator's Feedback and signature for this section.

- ❑ **Yes, learner implemented the initial Experience.**
- ❑ **No, learner DID NOT implement the initial Experience.**
